

<p>What is the Emerging Integrated Communications Technology? Compiled by Gregory L. Burrus</p>	<p>Need training? contact us</p>
<p>Integrated IOVC communication technology focuses on the people, the process and systems that enables your business to operate and communicate. Whether it is a word processing application, a voice communication system or an operational internet support system, the ability to flow information (voice and data) across your business environment is crucial to how employees, vendors and customers communicate important business information between each other. Building the synergy across these components guarantees improvement in your daily business operations. to build this synergy requires a supporting architecture.</p> <p>Architecture : Integrated Communications Technology</p> <p>The communication tools consist of the processes, methodologies and software applications that your organization uses on a daily basis to conduct your business.</p> <ul style="list-style-type: none"> This layer is used and seen by your personnel and customers daily. <p>The technology that supports your business communication tools provide specific capabilities that individually, hinder or enable your business operation.</p> <ul style="list-style-type: none"> This layer supports and drives your communication tools and your business environment. <p>The integration and collaboration of your communication tools across all your supported technologies provides your business with a major positive impact.</p> <ul style="list-style-type: none"> This layer drives and delivers the business benefits. 	<p>For your convenience a list of TechOSS Services:</p> <p><i>Internet Products</i></p> <ul style="list-style-type: none"> Domain Search Domain Register Personal Email Business Email Traffic Statistics Build a Web Site E-Commerce store Fax Thru Email™ Corp. Communications and people still drive your business. people are your employees, your customers, suppliers and competitors. people are what your customers believe in when they buy your products. Its imperative that your people be motivated by passion and have a true clarity of purpose. When clarity and passion mix your business grows and soars to unbelievable heights.

Situational Learning

We provide step by step assistance in helping you understand the technical and professional needs of your organization. TechOSS Training programs produce results because it's based on a Situational Learning methodology.

LAMPS Training Methodology

The foundation of our training program is that TechOSS applies the LAMPS Methodology. It is about the actual situation – not just theory – the focus is on producing tangible results.

5 Steps to Success

1. **Learn** about the situation and gain usable knowledge
2. **Activate** the process of working within the situation
3. **Motivate** the team to realize the value of the current situation
4. **Participate** in the planning, design and deployment of the solution
5. **Success** is recognized due to a situational learning approach
